Authorization for this examiner's amendment was given in a telephone interview with Gordon Lindeen on 11/15/2005.

The application has been amended as follows:

- Claim 19 has been amended to read:

--An external payload launch system comprising:

a launch vehicle having an interior and an exterior;

a motor to boost the launch vehicle into an exoatmospheric flight path;

a primary payload compartment in the launch vehicle interior to carry a primary payload;

a primary fairing to protect the payload compartment;

a secondary fairing mounted to the exterior of the launch vehicle to protect and contain a secondary payload in flight, the secondary payload having a mass less than one tenth the mass of the primary payload, and wherein a release mechanism within the secondary fairing releases the secondary payload in a direction opposite the launch vehicle's direction of travel,

the release mechanism to separate the secondary payload from the launch vehicle during the launch vehicle's flight.—.

- Claims 49, 54, 55, 63, 72, 73, 74 are dependant from claim 21.

2. The following is an examiner's statement of reasons for allowance: the prior art does not disclose a second fairing having a release mechanism therein for releasing a second payload from within the second fairing to outside the second fairing.
